

SIP Trunking

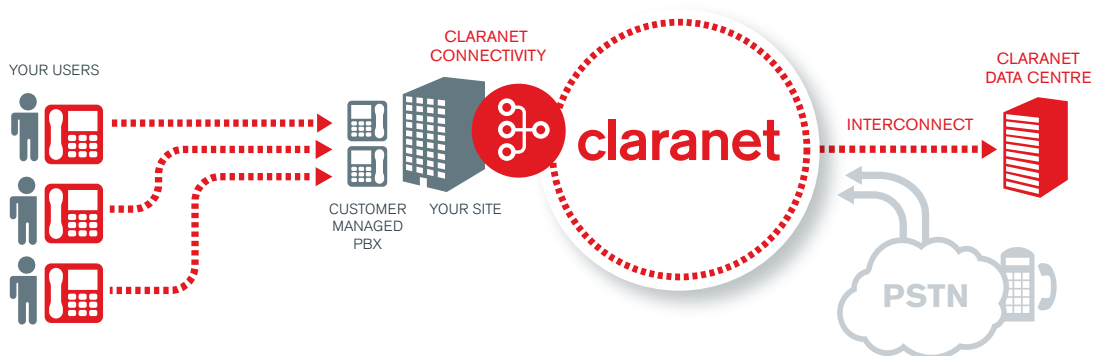

Protect your existing investment or refresh your telephony with Claranet

SIP Trunking connects your existing private branch exchange (PBX) to the national public switched telephone network (PSTN) using an IP connection. This provides a more flexible and low cost replacement to ISDN connections into the PBX. Alternatively, if you are looking to refresh your telephone system, see our Hosted Voice services.

Why choose Claranet for SIP Trunking?

- Expert advice included
- UK support 24x7x365 included
- Get the most from existing hardware
- Consolidate suppliers and save time and cost

Flexible and low cost replacement for ISDN lines

SIP Trunking service overview

- Private IP telephony service that doesn't touch the public internet
- Geographic and non-geographic numbers
- Flex the number of channels as your requirements change
- Foundations of a future proof communications solution
- Stability and confidence through market-leading partnership
- 24x7x365 UK support
- 99.987% service availability

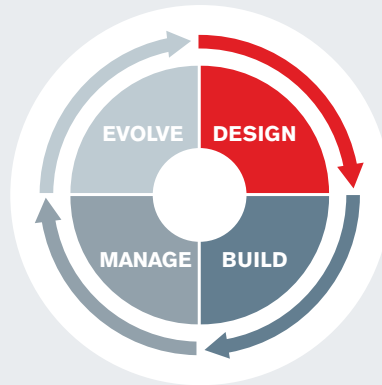

How we work with you

1 - Design

Our experts can advise you how our telephony options can be tailored to your business needs

2 - Build

Working with Claranet removes the burden of managing and carrying out the installation of your SIP Trunking service yourself, saving you time.

3 - Manage

We take care of the ongoing 24x7 management of your service. However, you retain the control you need with access to around the clock UK support.

4 - Evolve

We work with you to ensure your service continually meets your needs.
